

# Pando Edge AI Solution Accelerator

Accelerate your Edge AI POC with Esper's help and expertise. Go from idea to proven concept, and make the business case for AI deployment. Reach out to **pando@esper.io** to learn more.

Used by  **Minor Decliner**

## ESPER PANDO: THE PATH TO IMPLEMENT EDGE AI POCS

### With Esper's Pando Edge AI Solution Accelerator you can quickly & efficiently deliver edge AI PoCs for Dedicated Device use Cases

Get to a PoC quickly, iterate, and then deploy at scale with Esper's Edge AI Solution Accelerator

## The challenge of implementing edge AI

AI is driving a revolution across vertical markets, yet technical teams from SMB to Enterprise often face barriers to unlocking its full power at the Edge. Two primary challenges stand in the way:

- **Skill gaps:** Companies often lack the in-house technical expertise required to initiate, develop, and integrate Edge AI solutions effectively.
- **Scaling hurdles:** Scaling AI projects from proof of concept to full-fledged production introduces complexities in management, monitoring, and security, often overwhelming limited resources.

## Introducing Esper Pando Edge AI Solution Accelerator

Esper's Pando solution tackles these challenges directly:

- **Filling the Skills Gap:** The Pando Solutions Accelerator helps SMBs and Enterprises rapidly develop and test Edge AI solutions.
- **Production Hurdle:** Esper's device management capabilities simplify the complex process of scaling AI from proof-of-concept to full deployment.

The Pando Solutions Accelerator helps you get started on projects such as vision analytics, LLM and RAG at the Edge

without requiring complex bring up or domain knowledge. Ideate, envision and realize with Esper's Pando Solution Accelerator!

**Maximizing on-device AI:** Custom-tailored AI solutions that are optimized to leverage the full power of existing hardware capabilities.

**Streamlining scalability & security:** A simplified, secure path from proof of concept to full production, enabling effortless scaling.

**Empowering customers:** Providing user-friendly tools that allow businesses, regardless of their technical expertise, to rapidly integrate and scale Edge AI solutions.

## Pando in action: Minor Decliner

Powered by Esper's device management and edge AI deployment capabilities, Minor Decliner's patent-pending technology enables organizations to equip their existing self-service kiosks with state-of-the-art AI-driven age verification. This allows for fully compliant and unattended self-checkout of age-restricted items while providing liability protection and an effective affirmative defense.
